Narrative Reporting – Central Vermont Medical Center (CVMC)

For fiscal year 2025, provide the following in .pdf format emailed to GMCB.

- **A description of the community health initiatives or programs that received funding from your hospital's 340B program participation, including how these investments are intended to improve access to care and quality of services. Specify the aggregate amount invested toward all such programs.**

CVMC uses its 340B Program participation savings to:

- Fund patient assistance programs that provide access to care to patients with financial need.
- Provide necessary care to all patients regardless of ability to pay.
- Support the health and wellness of our communities in Vermont.
- Help keep our hospital solvent to ensure patients in our region have access to comprehensive, high-quality care.

CVMC invested $35,523,578 toward the above programs and services. The total community benefit reported reflects FY24. The community benefit is compiled using tax information, which has not yet been completed for FY25.

- **A description of the hospital's internal review and oversight of its participation in the 340B program in compliance with the U.S. Department of Health and Human Services, Health Resources and Services Administration's 340B program rules and guidance.**

CVMC has dedicated 340B resources who ensure 340B Program participation and compliance requirements are met through internal review processes that entail completing annual hospital recertification, regularly reviewing transactions for 340B eligibility criteria consistent with HRSA's patient definition, maintaining OPAIS accuracy, creating and regularly updating policy and procedure documents that clearly outline 340B Program operations, managing Third-party administrator configurations to achieve logic consistent with CVMC's expectations, and engaging with a vendor on an annual external HRSA 340B mock audit as part of ensuring HRSA audit readiness.

CVMC's internal review processes are designed to help prevent diversion, duplicate discounts, and incorrect 340B OPAIS records, as required by HRSA for 340B Program participation. CVMC has designated a Primary Contact and an Authorizing Official with HRSA, who are dedicated to 340B Program compliance and coordination with HRSA on registration, oversight, and program participation tasks. Additionally, CVMC has a 340B Oversight Committee, which meets quarterly and helps oversee 340B operations and decisions related to program participation.

Orphan drugs are included as part of aggregated totals and are not separated out in the Adaptive

Insights Portal submission.

ACO payments received are included in the payments received total for bundled administered drugs, for which a WAC-based estimate was used.

- **A description of how the aggregated payment amount is calculated for payments made for all other internal expenses related to administering the 340B program during fiscal year 2025.**

The internal expenses include the total salary and fringe for the 8.0 FTEs supporting the 340B Program at UVM Health. The breakdown includes 7.0 Pharmacy 340B Program Analyst FTEs and 1.0 System 340B Pharmacy Manager. From this total, the shared service allocation was applied to represent the expense for each hospital.
