State of Vermont, Green Mountain Care Board 340B Reporting for FY 2025

Narrative Report

1. North Country Hospital utilizes the benefits of the 340B Drug Pricing Program to extend scarce resources to ensure the best possible care to our rural population in the northeast kingdom of Vermont. These low-income, uninsured, and vulnerable patients are the focus of the majority of our 340B benefit by subsidizing uncompensated care. North Country Hospital also utilizes this 340B benefit to fund a Medication Assistance Program facilitator who assists hundreds of patients every year in accessing more affordable medications. NCH had a net community benefit expense of $886,347 for which NCH supplements with 340B benefit.
2. North Country Hospital manages compliance via monthly self-audits of 100 samples across all 340B universes in addition to an annual third-party full program audit. A quarterly 340B compliance meeting reviews the program and reports to senior leadership.
3. The aggregate internal payment related to the 340B Program during fiscal year 2025 was $1,024,451.42. This was calculated by utilizing the Medicare cost report overhead as a percentage of 340B cost relative to total pharmacy cost.
